

## Join JEA

The Japan Epidemiological Association is an academic society established in 1991 to promote the exchange of ideas and discussion among members, as well as the development and advancement of epidemiological studies. The number of Society members reached 2,300 (July 1, 2019) with 9-fold increase during the past quarter of century. The importance of epidemiology is increasingly recognized in other fields, including clinical medicine, dentistry, pharmacy, nursing, nutrition, physical and occupational therapy and social sciences. We welcome the participation of a diverse range of personnel and researchers from all over the world, and wish to invite you to become a member of JEA.
